“ CIET 2025 has shown that Turkmenistan's industrial strategy is not only about growth, but about responsibility — a commitment to green technology, innovation, and global partnership. ”

**Baymyrat Annamammedov**

Deputy Chairman of the Cabinet of Ministers of Turkmenistan

# Executive Summary

CIET 2025 reaffirmed Turkmenistan's strategic commitment to industrial modernization, sustainable construction, clean energy, and innovation-driven growth. Held in the National Tourist Zone Avaza, the conference and exhibition brought together policymakers, industry leaders, investors, and international organizations to advance dialogue on resilient infrastructure, green technologies, and diversified economic development. This Impact Report consolidates key outcomes, policy messages, investment signals, and expert insights from CIET 2025. Structured in line with international best practices used by leading global forums, the report provides a fact-based overview of Turkmenistan's evolving construction, industrial, chemical, and energy sectors.

Ashgabat's transformation into a modern, sustainable city is the result of a strategic, science-based approach to urban development that prioritizes quality of life, environmental responsibility, and long-term resilience.

**Vladimir Petruk**  
*Managing Director, Interbudmontazh*

Against the backdrop of global economic transformation, digitalization, and climate responsibility, CIET 2025 delivered a clear message: sustainable growth requires smart construction, clean energy solutions, strong human capital, and trusted international cooperation.

Mitsubishi Heavy Industries is honored to contribute to Turkmenistan's economic growth through long-term partnerships built on trust, shared values, and technological excellence.

**Eisaku Ito**  
*President and CEO, Mitsubishi Heavy Industries, Ltd.*

## Infrastructure and Industrial Milestones

CIET 2025 showcased landmark national projects that symbolize Turkmenistan's modernization drive:

- Opening of the automobile bridge across the Garabogaz Köl Bay
- Groundbreaking of a new section of the Turkmenbashi–Garabogaz highway toward the Kazakhstan border
- Commissioning of the carbamide plant and water treatment facility in Esenguly
- Expansion of domestic production capacities in cement, ceramics, glass, and chemicals

These projects strengthen regional connectivity, enhance industrial self-sufficiency, and support export potential.

## CIET 2025 in Numbers

- **1,080+** delegates from **55** countries
- Ministers, senior government officials, CEOs, and global experts
- Leading national and international industrial, construction, and technology companies
- High-level participation from international organizations, including UNIDO
- Latest investment opportunities in construction and industrial sectors presented
- Multiple national infrastructure and industrial milestones showcased
- Extensive international and regional media coverage

**Baymyrat Annamammedov**

Deputy Chairman of the Cabinet  
of Ministers of Turkmenistan

By integrating advanced technologies, environmentally friendly industrial practices, and high-capacity production facilities, Turkmenistan is transforming its natural resources into high value-added products.

**Erman Ilicak**  
Chairman, Rönesans Holding

## OPENING AND HIGH-LEVEL MESSAGES

The conference opened with strong emphasis on Turkmenistan's long-term vision for sustainable industrial growth. High-level speakers highlighted the alignment of national development programs with global trends in green construction, clean energy deployment, and digital transformation.

Government representatives reaffirmed support for public-private partnerships, technology transfer, and international investment as essential drivers of economic resilience and diversification.

## SMART CONSTRUCTION AND SUSTAINABLE INDUSTRY

Discussions at CIET 2025 emphasized the transition toward smart construction and resource-efficient industrial processes:

- Adoption of modern building technologies and materials
  - Integration of digital design, automation, and quality control
  - Energy-efficient and environmentally responsible construction practices
  - Alignment with international sustainability standards
- Speakers highlighted that smart construction is a cornerstone of long-term competitiveness and urban resilience.

## CLEAN ENERGY, EDUCATION, AND HUMAN CAPITAL

A key theme of CIET 2025 was the role of education and innovation in supporting the energy transition. The State Energy Institute of Turkmenistan presented its new educational and research complex focused on:

- Renewable and hydrogen energy technologies
- Digital systems and smart energy management
- International academic cooperation and certification

The integration of clean energy projects with human capital development was identified as a strategic advantage for Turkmenistan.

## DIGITAL TRANSFORMATION AND INDUSTRY 4.0

International experts, including UNIDO representatives, highlighted the transformative potential of Industry 4.0 technologies:

- Digitalization of industrial processes
- AI-enabled efficiency and predictive maintenance
- Smart manufacturing and data-driven decision-making
- Enhanced productivity with reduced environmental footprint

Digital transformation was presented as a catalyst for inclusive, resilient, and sustainable industrial growth.

Democratizing AI and bridging the digital divide, UNIDO creates opportunities for collaboration, innovation, and global impact in industrial transformation.”

**Farrukh Alimdjjanov**  
Industrial Development Officer, Division of Digital Transformation and AI, UNIDO

## PRIVATE SECTOR ENGAGEMENT AND INVESTMENT CLIMATE

CIET 2025 demonstrated strong private sector momentum:

- New ceramic, chemical, and steel pipe manufacturing projects
- Expansion of export-oriented production under the “Made in Turkmenistan” brand
- Job creation and development of domestic supply chains

International companies praised the forum's organization and expressed readiness to deepen cooperation through joint ventures, technology partnerships, and long-term investment.

## MEDIA COVERAGE AND INTERNATIONAL VISIBILITY

CIET 2025 received wide coverage from:

- International and regional media outlets
- Economic and industry-focused platforms
- Eurasian and Central Asian business media

Media attention highlighted Turkmenistan's industrial achievements, investment opportunities, and commitment to sustainable development.

Reliable price benchmarks are essential for identifying market trends, managing volatility, and supporting informed decision-making across the cement and construction value chain.

**Binny Sabharwal**  
Senior Price Reporter, Minerals and Fertilizers,  
S&P Global Platts

Projects such as the Kelete Cement Plant, the Mary fertilizer plant, and the GTG-1 complex demonstrate the strength of international cooperation between Turkmenistan, Japan, and strategic partners.

**Tomohiro Takashina**  
 Director of the Representative Office,  
 Kawasaki Heavy Industries, Ltd.

### CIET 2025 Exhibition

Running alongside the International Conference, the CIET 2025 Exhibition provided a high-profile platform for innovation and international collaboration. **Over 50 leading companies from 20 countries** showcased their state-of-the-art technologies, solutions, and services across construction, industrial, chemical, and energy sectors. The exhibition highlighted advanced building materials, smart construction systems, renewable energy technologies, and modern industrial equipment, offering delegates direct engagement with global technology providers and investment partners. Visitors explored live demonstrations, discussed potential collaborations, and identified concrete opportunities for joint ventures and strategic partnerships, underscoring Turkmenistan's commitment to sustainable development, modernization, and integration into the global innovation ecosystem.

### CONCLUSION AND OUTLOOK

CIET 2025 confirmed Turkmenistan's growing role as a regional hub for smart construction, sustainable industry, and clean energy development. The conference strengthened confidence among international partners and reinforced the country's reputation as a stable, forward-looking investment destination.

Looking ahead, Turkmenistan is well positioned to accelerate industrial diversification, expand green technologies, and deepen international cooperation—building not only modern infrastructure, but lasting partnerships that connect its future with the world.
